Balanced Water A Better Life.

AUTOMATIC pH CONTROL

A Healthier Pool Starts with the Right pH.

Our Stenner automatic acid feeding system keeps your pool locked at the ideal 7.4 — so the water stays clear, comfortable, and gentle on your equipment, all year long.

YOUR POOL, ALWAYS AT **7.4** THE IDEAL pH

Stenner 7.5 Gallon Chemical Tank with Econ T Series Pump (15 GPD)

- PRECISE DOSING
- RELIABLE PERFORMANCE
- PROFESSIONAL GRADE

Small Adjustments Big Results.

WHY pH MATTERS

Prevents calcium buildup
Helps avoid scale on tile, plaster, heaters, salt cells, and other equipment.

Keeps water clear and beautiful
Proper pH helps prevent cloudy water, stains and calcium deposits.

More comfortable swimming
Gentle on your skin and eyes.

Protects your investment
Helps your equipment last longer and perform better.

WHY pH OSCILLATES IN FLORIDA

In our region, pH levels can change quickly due to:

- Intense sun and heat
- Rain and high humidity
- Evaporation during dry seasons (when we add water)
- Fresh water with different chemistry

These constant changes make pH difficult to control manually. The Stenner system **automatically adds small, precise doses of acid** to keep your pH stable at 7.4 — every day, without the guesswork.

HOW IT WORKS

1. **Monitors and doses**
   The Stenner pump slowly adds muriatic acid from the 7.5-gallon tank in precise amounts.
2. **Keeps pH stable**
   Maintains the ideal pH of 7.4, 24/7.
3. **You enjoy the results**
   Cleaner water, less calcium buildup, and a healthier, longer-lasting pool.

THE RESULTS YOU'LL SEE

- Less calcium buildup and calcium deposits
- Crystal clear water
- A more enjoyable swimming experience
- Longer life for your equipment and finish

Consistent Care for a Beautiful Pool.

Have questions?
Ask your Liquid Luxe technician about the Stenner system on your next service visit — installation is quick and works with any salt or traditional pool.
