LIQUID LUXE
A JMC Pools Company

DESIGN. BUILD. ESCAPE.

Control Your Pool With the iAquaLink App

Pump, lights, heater and more — set up once, run it all from your phone, wherever you are.

PUMP On / Off

LIGHTS Colors & Schedules

HEATER Set Temperature

AND MORE All from your phone

Your equipment includes a Jandy AquaLink automation system with a Wi-Fi antenna on the equipment pad. Once it's linked to the free iAquaLink app, you can turn equipment on and off, adjust the heater and set schedules — over Wi-Fi at home, or over cellular data anywhere else.

1 Download the App

Get "iAquaLink" free on the App Store or Google Play, and create a free account.

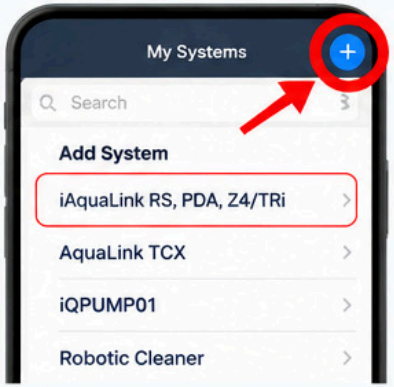

iAquaLink
Zodiac Pool Systems, Inc.

Download on the App Store

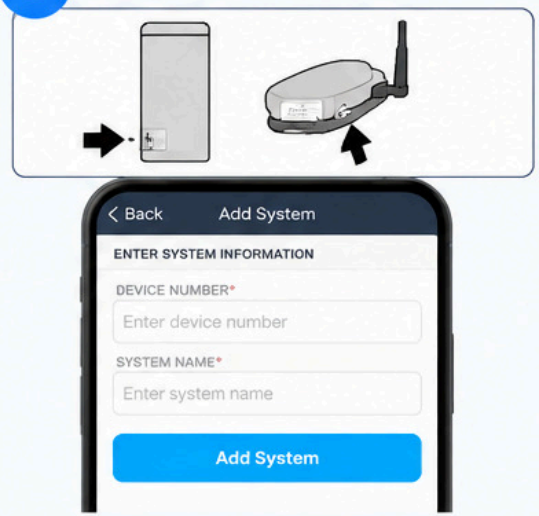

GET IT ON Google Play

2 Add Your Pool

Tap the + in the top-right corner, then choose the first option — iAquaLink RS, PDA, Z4.

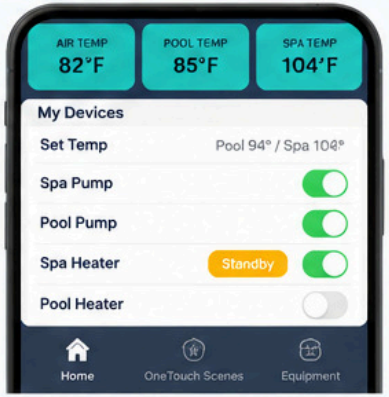

3 Enter Your Device

4 You're Connected

Once it's linked, control equipment right from your phone, anywhere.

Tip: Setup only works while your phone is on the same Wi-Fi network as the antenna on the equipment pad.
After that first connection, the app works from anywhere (Wi-Fi or cellular data).

Relax. We've Got You Connected.
